WORK EXPERIENCE

MonatizeAd |(4 months) 2020

- Created optimized and reusable react components
- Used redux for creating state and managing api data with axios
- Also helped with fixing simple static websites

SnagaBih|(ongoing) 2021

- Wrote static website fixed their template
- Used node js and atlas mongo for backend and database
- Helped with DevOps and SEO

PROJECTS

YOUTUBE ADDICT

([HTTPS://GITHUB.COM/BUGENZI/YOUTUBE-ADDICT](https://github.com/bugenzi/youtube-addict))

- Google chrome extension built with js . Removing the recommended videos you can only see videos that you look for .

MY BLOG

([HTTPS://GITHUB.COM/BUGENZI/GATSBY_BLOG_GRAPHQL](https://github.com/bugenzi/gatsby-blog-graphql))

- Built using headless cms (contentful) and gatsby so I can write and publish react as static website on github pages, graphql for managing the incoming data that was sent from cms

SOCIAL MEDIA (FULL STACK APP)

([HTTPS://GITHUB.COM/BUGENZI/FULLSTACK_APP](https://github.com/bugenzi/fullstack-app))

- Backend: Nodejs and express for backend and web service , atlas mongo(mongoose odm) for database and cloud storage, and jwt for web token and authentication
- Frontend: React as front end library , redux and axios for state and api handling and material ui
